OBJECTIVE OF THE TRAINING:

The primary objective of this training program is to bridge the gap between academic knowledge and industry expectations by equipping students with hands-on experience in Web Programming and backend operations.

Through this course, students will:

- 1 Gain practical knowledge of modern web designing and responsive website development.
- 2 Develop skills in creating user-friendly and interactive web interfaces using HTML, CSS, JavaScript and PHP.
- 3 Able to do backend integration techniques for developing dynamic and data-driven web applications.
- 4 Get hands-on experience in database connectivity, server-side programming, and API integration.
- 5 Enhance problem-solving, debugging, and project development skills through real-time industry-oriented tasks.

OUTCOME OF THE SSIP:

Upon completion of the SSIP students will be able to design and develop responsive, interactive, and database-driven web applications using frontend and backend technologies.
